## CAREER OBJECTIVE

An aspiring ml and ai engineer and a 2nd year student at IIT madras studying data science , i am passionate and inclined towards ensuring self discipline, Currently I want to get the experience in research topics regarding machine learning and ai.

## EDUCATION

### Bachelor of Science (B.S), Data Science

2024 - 2028

Indian Institute Of Technology Madras

CGPA: 9.00/10

## TRAININGS / CERTIFICATIONS

### Machine Learning Specialisation

Mar 2025 - Present

Deeplearning.ai, Virtual

This course is a highly professional course which goes in-depth of some of the most fundamental concepts of machine learning -

1-Supervised machine learning telling about regression and classification and its application to model data and making models to gain the at most accurate output.

2-Advanced Learning Algorithms- I learned and applied more sophisticated and powerful models beyond basic ones

3- Unsupervised learning-learned about reinforcement learning and clustering and its application through kaggle data sets

## PORTFOLIO

[Portfolio link ↗](#)

## PROJECTS

### [Linear Regression Model for checking house prices ↗](#)

↗

Apr 2025

Made a A model which tells us the total cost required to buy a house of a size x which then tells us the cost for that amount of land, it uses the concept of linear regression , which is a very effective way to represent data with 2 attributes.

-Used Numpy and Matplotlib.

-Used the concepts of linear algebra like finding the slope of the data for clear visualisations.

### [Cost Function ↗](#)

Apr 2025

Made a cost function in python which checks the most fitted value for w(slope) such that the linear regression model minimises the error.

- Used Matplotlib and numpy.

-Took a dataset with 2 sample only.

## SKILLS

- |                  |                           |                       |
|------------------|---------------------------|-----------------------|
| • Python         | • Machine Learning        | • Supervised Learning |
| • Linear Algebra | • Statistics              | • MS-Excel            |
| • MS-Word        | • Effective Communication | • Tableau             |
| • NumPy          |                           |                       |

## EXTRA CURRICULAR ACTIVITIES

- 1- RC(Regional Coordinator) - My responsibility is to notify the students of my area about the new Rules put up by the the college board.
- 2- Head of Public Relations and Outreach department at my college's sports society.
